The following is an examiner's statement of reasons for allowance: Ojima et al. (US 5138746, figures 1-8) is the closest art and teaches a clamp including an engagement hole 30, an engagement pawl 35, a first boot band pawl 40 and a second boot band pawl 45, 50. As to claim 1, Ojima et al. fails to further teach in combination "a slit formed between said first boot-band pawl and said engagement hole in said outer layer portion of said band body" (lines 16-17) and such structure provides the combination with the advantages enumerated in the specification in [0023] and [0024]. In regard to claim 2, Ojima et al. fails to further teach in combination "a slit formed between said first boot-band pawl and the engagement hole in the outer layer portion of the band, and a temporary-tacking pawl formed on said inner-layer portion of said band body, and is inserted into and engaged with said slit, so that said band body is made to be in a temporary-tacking condition in a ring-like form" (lines 16-20) and such structure provides the combination with the advantages enumerated in the specification in [0026] and [0027]. As to claim 3, Ojima et al. fails to further teach in combination "a reinforcing part formed between said second boot-band pawl and the engagement pawl" (line 16) and such structure provides the combination with the advantages enumerated in the specification in [0030]. In each case distinct advantages are obtained by a different design from that of Ojima et al. that leads to a different functional capability of the band that is an improvement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, 5, 13, 6, 14, 7, 2, 8, 15, 10, 11, 3, 4, 9, 16 and 12, renumbered 1-16 respectively, are allowed.

The substitute specification received May 2, 2008 has been entered.
